

## About Bayley IV India

The Bayley-4 Scales of Infant and Toddler Development has been adapted and standardized for India, in six languages: **English, Hindi, Kannada, Marathi, Tamil and Bengali.**

The Bayley -4 INDIA includes India norms for the Cognitive, Language and Motor Scales along with U.S. norms for the Social-Emotional and Adaptive Behaviour Scales. Assessment of the Cognitive, Language, and Motor domains is accomplished by administering structured items to the child and engaging the caregiver to support responses where appropriate. The Social-Emotional and Adaptive Behavior scales are administered via caregiver questionnaire which allows them to share their own observations of the child's abilities.

### Age Range
